FabSkill

Artificial Intelligence Scientist Intern
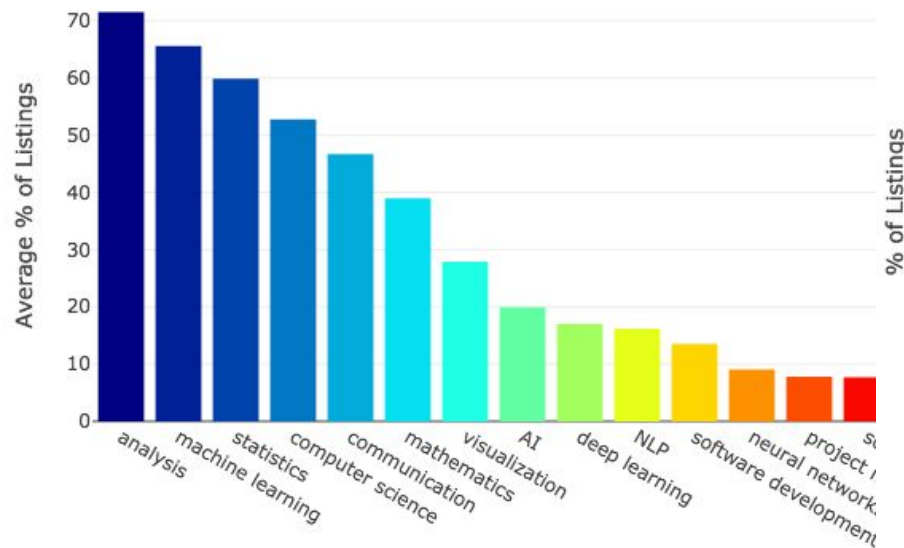

🕐 il y a 6 jours

Primary Responsibilities:

- Collaborate with data scientists and data engineers to design, prioritize and implement new features for our AI platform to solve real customer problems
- Understand workflows and requirements to identify improvement possibilities through AI tools
- Write clear, maintainable, and tested code
- Conduct research into state-of-the-art deep learning methods and add implementations and examples to the AI platform
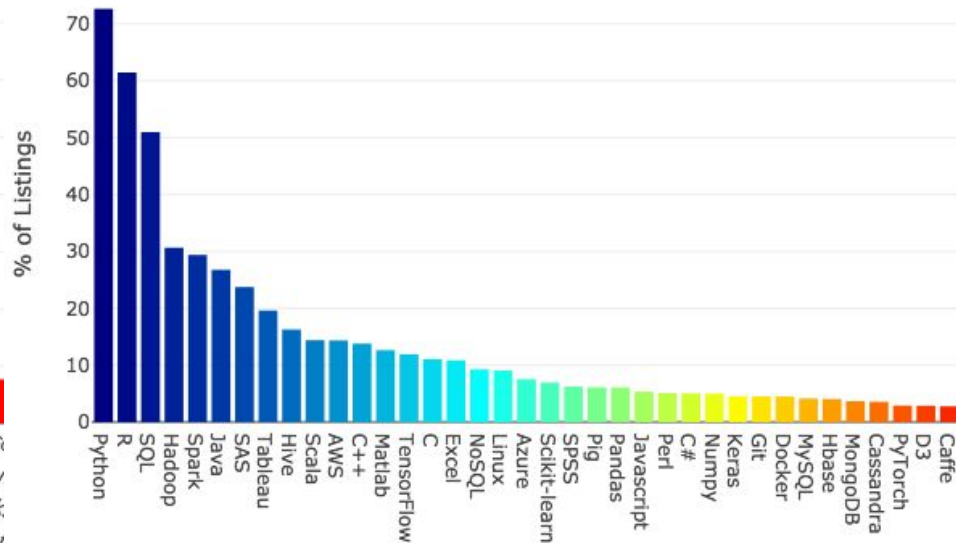

Basic Qualifications

- Advanced academic degree in Comp Science, Engineering, Statistics, or related field
- Working towards or completed graduate degree in related field
- Prior experience with Python
- Prior experience with Tensorflow or PyTorch
- Entrepreneurial and customer-oriented mindset
- Excellent communication skills

Counter Offers often happen and it'll give you a great confidence booster when they do BUT always remember and be aware of why you started searching for a new opportunity in the first place & what's really important to you and your career development. When you accept a counter offer, make sure you have an exit plan. Have you been counter offered and how'd it turn out?
